: 6,925,202 B2

DATED

: 8/2/2005

INVENTOR(S)

: Linard Karklin, et al.

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

Column 26, line 23, insert a colon after "includes" and begin a new paragraph thereafter.

Column 26, line 24, replace "feature." with --feature; providing a plurality of theoretical cuts substantially perpendicular to the centerline, wherein each cut creates a rib extending from the centerline to an edge of the feature; and comparing at least two ribs to determine edge roughness.--

Column 26, line 34, insert a colon after "includes" and begin a new paragraph thereafter.

Column 26, line 35, replace "feature." with --feature;
providing a plurality of theoretical cuts substantially
perpendicular to the centerline, wherein each cut creates a rib
extending from the centerline to an edge of the feature; and
comparing at least two ribs to determine edge roughness.--

Column 27, line 4, replace "an" with --any--.

Column 27, line 8, insert a colon after "includes" and begin a new paragraph thereafter.

Column 27, line 8, replace "feature" with --contact--.

Column 27, line 9, replace "feature." with --contact; providing a plurality of theoretical cuts substantially perpendicular to the centerline, wherein each cut creates a rib extending from the centerline to an edge of the contact; and comparing at least two ribs to determine corner rounding.--

INVENTOR(S)

: Linard Karklin, et al.

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

Column 27, line 19, replace "feature." with --feature, the measurement provided by making a plurality of theoretical cuts substantially perpendicular to the centerline, each cut creating a rib extending from the centerline to an edge associated with the repaired feature, and comparing at least two ribs.--

Column 27, line 36, replace "centerline." with --centerline, wherein the means for measuring includes:

means for providing a plurality of theoretical cuts substantially perpendicular to the centerline, wherein each cut creates a rib extending from the centerline to an edge of the feature; and

means for comparing at least two ribs .--

Column 27, line 61, replace "standard." with --standard, wherein the means for determining includes:

means for providing a plurality of theoretical cuts substantially perpendicular to the centerline, wherein each cut creates a rib extending from the centerline to an edge of the feature; and

means for comparing at least two ribs.--

Column 28, line 35, replace "centerline." with --centerline, wherein the analyzing includes making a plurality of theoretical cuts substantially perpendicular to the centerline, each cut creating a rib extending from the centerline to an edge of the feature, and comparing at least two ribs.--
